RESEARCH INTERESTS

- **Efficient Deep Learning for Computer Vision** – Lightweight models for OCR and image recognition.
- **Medical Image Analysis** – Deep learning for medical imaging and diagnostics.
- **Generative & Multimodal AI** – Vision-language models and generative methods.

EDUCATION

- **B.Sc. in “Computer Engineering” at Sadjad University of Technology, Razavi Khorasan Province, Iran**
 - *Sep 2018 - Sep 2022*
 - **CGPA:** 3.6 / 4
 - **Final Project:** Smart Lock with Image Processing and Embedded Vision (ESP32-CAM) – Hardware implementation in Arduino; image processing module in Python.
 - **Notable Courses:** Applied Linear Algebra (20/20), Multimedia Systems (18.65/20), Fundamentals of Computational Intelligence (20/20), Project (19/20), Internship (20/20)

RESEARCH EXPERIENCES

- **Independent Research Collaborator — Supervised by Dr. Boshra Rajaei, Centre Borelli, ENS Paris-Saclay**
 - *Jan 2026 – Present*
 - Conducting research on deep learning-based OCR and text detection, including dataset preprocessing, experimental design, and model development.

TEACHING EXPERIENCE

Teaching Assistant (Undergraduate) -Sadjad University of Technology

- *Fall 2020 – Spring 2022*
- Led tutorials in Programming, Discrete Math, Data Structures, and Linear Algebra; supported students via office hours and assignment feedback.

SKILLS

Core AI/ML: PyTorch, Scikit-Learn, OpenCV, NumPy, Pandas

Software Development: Python, C++, TypeScript, Angular, React, Docker, Git, Linux

PROFESSIONAL EXPERIENCES

Founder / Product & Technical Lead

- **Founder & Product/Technical Lead, WebVision**
 - *Apr 2026 – Present*
 - Leads product and technical direction across computer vision, AI-based UI understanding, code generation, and web technologies — building an early-stage platform that converts website screenshots and design concepts into editable web interfaces (core prototype in development).

AI / Computer Vision Experience

- **Computer Vision Developer, SAIWA · Part-time**
 - *Oct 2020 – June 2021*
 - Designed and optimized computer vision pipelines for **segmentation, detection, and classification tasks**, collaborating with a cross-functional team to integrate AI-based solutions into products.

- **Computer Vision Developer (Intern), MV-Lab, Sadjad University**
 - *Jul 2020 – Oct 2020*
 - Implemented image-processing algorithms using Python and OpenCV, supporting research-oriented computer vision and machine learning projects.

Software Engineering Experience

- **Frontend Web Developer → Frontend Team Lead, Samin Rayane**
 - *July 2021 – Dec 2025*
 - Developed scalable Angular applications using TypeScript, Angular Material, RxJS, NgRx, Tailwind CSS, and REST APIs; promoted to Frontend Team Lead in Apr 2023, managing 4 developers, code reviews, and technical direction.
 - Mentored 3 engineering interns and delivered internal training on modern frontend and AI-assisted development.
- **Selected Project — Siteesho | Web & E-commerce Website Builder:**
 - Led frontend architecture for a scalable SaaS platform with a visual page builder, e-commerce, and responsive/PWA experiences.
- **Frontend Web Developer (Project-Based), TECVICO · Part-time**
 - *Feb 2021 – June 2021*
 - Developed enterprise dashboards and reusable UI components using Angular, TypeScript, Angular Material, and Bootstrap for international clients in a remote agile team.
- **Frontend Web Developer Roshdana · Intern**
 - *Jul 2019 – Jul 2020*
 - Built responsive web interfaces using HTML, CSS, and JavaScript, first full-time for 3 months, then part-time through periodic training.

VOLUNTEER & COMMUNITY OUTREACH

- **Volunteer AI Educator | LIMOO HOST Company**
 - *Oct 2025 – Nov 2025*
 - Designed and delivered an AI upskilling program for 50+ software engineers, covering practical AI tools for coding, debugging, documentation, and refactoring.
- **Career Guidance Program | Lead Mentor | Independent Initiative**
 - *Jul 2024*
 - Delivered a free 10-session career program for 15 Math/Physics students at my former high school, covering majors, job markets, and career paths tailored to their strengths.

NOTABLE ACADEMIC PROJECTS & ACTIVITIES

- **Computational Intelligence Projects (C++ & Python)**
 - Developed and implemented neural network algorithms from scratch, including Genetic Algorithms, Multilayer Perceptron (MLP), Adaline, and Perceptron.
- **Competitive Programming & Algorithmic Problem Solving**
 - Participated in ACM-style and university programming contests, focusing on algorithms, data structures, and efficient problem-solving. ([UVa Online Judge](#))

RELEVANT TRAINING IN AI & COMPUTER SCIENCE

- **Supervised Machine Learning: Regression and Classification** — DeepLearning.AI & Stanford University (Coursera), Jan 2025

- **Skill-Up Maths for Computer Science** — GeeksforGeeks, 50-day program covering core mathematical foundations for CS, Oct 2025

HONORS & AWARDS

- **Ranked in the Top 5 (Top ~4%) out of ~120 students by cumulative GPA, B.Sc. Computer Engineering, Sadjad University of Technology**

LANGUAGES

English: TOEFL — Overall: 5/6

Persian: Native
